

# BRINGING TOGETHER ISRAEL'S BEST WATER TECHNOLOGIES

The Israel Water Consortium (IWC) brings synergistic Israeli water solutions and innovative technologies to the international arena.

Comprised of the leading Israeli companies in each key area of water treatment, the IWC provides clients with truly holistic solutions that single-company engagement cannot deliver. By offering end-to-end consulting, planning, engineering, command and control and implementation, the IWC offers multi-faceted solutions to today's global water challenges.

The IWC operates under the auspices of the Israel Ministry of Trade and Labor and in close co-operation with the Israel Export Institute.

## ► Contact Us

If you would like to learn more about the IWC, or are interested in business opportunities or partnerships, please contact:

**Eran Eizik** consortium manager

**Email:** [eranwtt@usa.net](mailto:eranwtt@usa.net)

**Tel:** +972-528-528-582

**[www.i-water-c.com](http://www.i-water-c.com)**

**The IWC features eight of the brightest Israeli water technology companies in a one-stop entity, offering a powerful synergy of cutting-edge innovation and expertise in the fields of:**

- Drinking water treatment
- Wastewater treatment for the municipal and industrial sectors
- Energy generation from water
- Emergency water storage
- Water monitoring systems
- Water loss detection and re-use

**Aqwise** is a leading provider of biofilm-based processes designed to increase the capacity and efficiency of BOD and nutrient removal in water and wastewater treatment plants.

[www.aqwise.com](http://www.aqwise.com)

**Elgressy** develop and markets non-chemical solutions for the treatment of water related problems for cooling towers, heat exchangers, hot and cold water systems and many other industrial applications, all based on the electrochemical technology.

[www.elgressy.com](http://www.elgressy.com)

**EZPack** Water manufactures "bladder" water tanks, portable water storage and distribution systems.

[www.ezpackwater.com](http://www.ezpackwater.com)

**HydroSpin's** unique micro-generator produces electrical power from pipe water flow, powering monitoring and control devices even in remote or rural areas where energy is a challenge.

[www.hydrospin.net](http://www.hydrospin.net)

**Palgey Maim**, a leader in water, wastewater and recovery system design, implementation and maintenance, provides seamless delivery and integration of the different IWC capabilities.

[www.palgey-maim.co.il](http://www.palgey-maim.co.il)

**PowerCom's** smart water metering solution offers 2-way network monitoring and control for remote billing data, identification of pipe bursts & leaks within the hour, and has battery operation of over 10 years.

[www.powercom.co.il](http://www.powercom.co.il)

**ToxSorb** customizes filtration systems using its own proprietary media, engineered to remove specific heavy metals and minerals from water (Cr, Ni, Cu, Zn, Ag, CN, P, As, etc.)

[www.toxsorb.net](http://www.toxsorb.net)

**Triple-T's** patented TAYA technology is redefining biological wastewater treatment, delivering the highest quality results at the lowest operation cost of any technology on the market.
